Fewer Beaths, But More New Cases of the Disease-Hundreds of Bodles Unburied-Cholera Riots in Hamburg, Riszacs, and Musich-The American Quarantine Approved in England-Emigrante Planning to Evade It by Entering the Country by Way of Canada-The Plague in Russia.

Hamburg, Sept. 2.—Sedan Day has passed without festivities of any kind. There have been no processions, no music, and no meetings. No. a flag has been displayed in the city. The promenades and cafés are empty.

In all the churches services of prayer for the abatement of the plague have been held. They have been attended by crowds which have filled the buildings. Hardly a woman in colors or a man without the black badge of mourning on his arm was to be seen, and the prayers were offered amid the sobbing and groaning of the congregations. The desolation of the city has been apparent as at no other time since the introduction of the past. For an hour after the services the streets were filled with sad-faced men and weeping women At 2 o'clock they were again deserted, and since then have remained bare and still.

The number of fresh cases to-day has been 733, an increase of 52 since yesterday; the number of deaths 201, a decrease of 46 since yesterday. The decrease in the number of deaths is due to the corresponding decrease yesterday in the number of fresh cases. It offers little comfort, however, as the increase in the number of fresh cases to-day will be followed, undoubtedly, by a longer death list to-morrow. Nevertheless, there is a general feeling that the pest has been at its worst, and that, although it may not abate rapidly, it at least will not gain much more ground. The panie is not over, as the authorities would have people outside of the city believe. Fewer persons have left the city to-day than in previous days of the week only because most men who could get away had already left with their families. The city, in fact, has been virtually depopulated of all persons of

wealth or leisure.

The number of burials to-day has been 315. or two more than yesterday. Still hundreds of bodies are unburied. The dead wagons are utterly unequal to the work of carrying the bodies of all the victims to decent burial. Unless some improvement be made at once in the system the authorities will find themselves obliged to give up individual interment and bury bodies by the score in trenches Only immediate action can prevent severa hospitals from becoming breeding houses of

LONDON, Sept. 2.—The action of President Harrison in ordering that all vessels carrying immigrants shall be subjected to a quarantine of twenty days meets with general approval here. The Pall Mail Gazette says that since England is the usual resting place for immigrants en route to America, the course taken by President Harrison ought to be of assistance to England in relieving this country of much of the element that now endangers the public health, and ought to help the Local Gov ernment Board in carrying out sanitary pre cautions.

The St. James's Gazette says that England ought at once to follow the example of America, as many Poles and Russians, and other objectionable immigrants, who would have objectionable immigrants, who would have gone to America if they had the opportunity will now make England their stopping place.
There is a widespread public sentiment in favor of prompt restraint upon immigration. Mr. Gladstone has received a despatch from the municipal authorities of Cork urging him to establish a quarantine after the American model.

PARIS. Sept. 2.—The disease described as cholerine is steadily declining with the approach of cool weather. Yesterday there were litteen new cases and three deaths.

The Russian Jew emigrants who have been encamped near Lyons for about a fortnight because the steamships from Marseilles for the United States were afraid to take them on account of their coming from the infected districts, have been shut out from going by the way of Havre, as was more recently intended, on account of the prevalence of cholers at that port and the severity of the American quarantine. They have to-day started for the French scaport of Disppe; thence they are to be eaken by steamer to Canada, whonce, it is understood, they will make their way into the United States. It is said that his new method is to be extensively followed by Russian Jews and other emigrants.

MONTREAL, Sept. 2.-The cruiser Druid, now Quebec, has been ordered by the Minister of Marine and Fisheries to proceed at once to Grosse Isle quarantine station and prevent vessels from passing without reporting. Most of the visitors were rom the South, New Jersey, and Connecticut. It should be added that, while the enthusistic prophecies of the visitors were like sweet music to Mr. Carter and the Major-Generals on his staff, evidences of doubt on their part were noticeable. It was more than ever apparent that the Republicans are distressed by the attacks of the Democrats on the provisions of

the Force bill. The literature on this measure sent out by Brother Harrity and his associates has greaty agitated Brother Carter and his associates. "Southern Republicans believe that the day of redemption is at hand. The people are weary of the election abuses. There are more Republicans in Louisiana than the North has any idea of. They are organizing rapidly, and the result of the election will be a surprise to the party in the North."

A carpet bagger from Birmingham, Ala., puts it stronger and says:

"All through the coast and Gulf States of the South the Republican lines are forming to do away with the old forms of coercion and ballot-box stuffing and crooked count."

J. W Southward, a Virginia shricker, declared: "The multitude of wavs the Democrats have of evading and overriding the registration laws is something fearful and wonderful. A Republican has to stay awake nights to even keep himself on the registration books." Mr. Southward closed by saying that he was the defeated candidate for Sheriff of Henrico county.

As to Connecticut Mr. Carter called upon ex-Representative Frederick Miles for assistance. Mr. Miles responded with his views of the benefit due to the McKinley law. "The tariff," said Mr. Miles, "has proven of immense benefit to the State in many directions. The tobacco crop is extremely large this year, unusually large. It will yield fully 1,000 pounds to the acre. Under the provisions of the McKinley act that tobacco will net to the grower about \$105 more per acre than under the old tariff."

Mr. Carter didn't get much about New Jersey, although ex-Senator Sewell, John Keen, Jr., Chairman of the Republican State Committee, and others were on hand. The ex-Senator Hawley of Connecticut and ex-Senator J. Siont Fassett have been sent to join the army of Republican spellbinders now at work in Maine.

JURDAN'S BODY FOUND, BUT LOST AGAIN BY ANOTHER SHIFT-

In the Band Above the Platform Where Jordan Had Reen Working-It will Probably be Recovered This Morsing Peter Jordan's body was found and lost again yesterday sixty-five feet beneath the surface in the well on Henry Cox's farm at Great Neck. Contractor Bahr located the body at 10 o'clock yesterday morning by means of an iron rod, with which he probed into the sand through holes bored in the side of the wooden shaft. Coroner Schenck was notified and word was sent to the buried man's wife and friends.

Everybody about the place felt relieved to think that the end was not far off. Farmer Cox's family in particular breathed freer when the news was communicated to them. The well is within sight of the kitchen door. and the protracted search, with its attendant dangers, has sorely tried the nerves of the female members of the family. Quick work followed the discovery. Tools

were lowered to Mr. Bahr and William Eato in the bottom of the pit and they at once began cutting out one of the heavy planks on the side of the shaft nearest the body. A hole six eet high and two feet wide was made and then the creaking windless which has stood at the top of the shaft since the well was begun was started again and the sand was drawn out. Half an hour's work and the body was eached. It was found to be hemmed around by the broken boards that formed the sheathng of the well. They could not be torn out for fear of bringing down the loose sand overhead, so the saw was again brought into use.

lead, so the saw was again brought into use. It was slow work, but when the men stopped at noon for lunch the body was freed from the knees to the shoulders.

Mr. Bahr busied himself at lunch time by making preparations for getting the body to the surface. A sheet of canvas was secured in which to wrap it, and it was proposed to fasten the body to an upright board, and in that position hoist it to the surface.

The news that the body was at last found created something of a sensation in the vicinity. It spread as far as Flushing. When work was about to be resumed in the afternoon the crowd became so great that Farmer Cox had ropes stretched in front of his place to keep curiosity seekers out.

Butthe ropes proved ineffectual, so Constable George floe was stationed outside the grounds. Coroner Schenck was on the ground with men for the jury.

Bahr and Fato descended into the well again, while the crowd above waited. Work was fairly under way when the faint sound of shifting sand caught the ears of the workmen above, who leaned over and looked down into the tlackness below.

shifting sand caught the ears of the workmen above, who leaned over and looked down into the I lackness below.

A shout to hoist away made the men at the windlass start, and the cranks soun violently around. As Babr came to sight out of the darkness in the bucket. Eato followed him on the ladders which run from the bottom to the top of the shaft.

Another cave-in had occurred at the bottom of the shaft, and the body was again lost in the sand. Fortunately both Babr and Fato were inside the wooden shaft when the sand descended. It poured into the shaft through the opening made in the side like water.

Mr. Bahr was greatly diaappointed, but work was not suspended for five minutes. Some of the men were put to carting straw to the mouth of the well, while Bahr rigged up a platform haif way down the shaft at the intersection of the second crib.

There is a cavity behind one side of this crib hig enough to drive a team through. Where the sand went to is a mystery. Straw had been packed down behind this crib to keep the sand from working out below, and Contractor Bahr says this has also disappeared. More straw was lowered down onto this platform yesterday and packed in the cavity behind the crib. It was about 5 o'clock in the evening when the digging was resumed. Providing no further accidents happen, the body will probably be reached again some time this morning.

will probably be reached again some time this morning.

Relatives of the dead man made all preparations to have the body buried in the Great Neck Cemetery, about half a mile from the weil, as soon as recovered.

Shortly after the cave-in occurred Undertaker Samuel Thorn of Roslyn drove on to the grounds with a coffin, and Jordan's widow and friends arrived in carriages. Mrs. Jordan became hysterical when informed that the well had again caved in, and her friends were compelled to take her away.

WHAT THE PARTY HAS TO DO.

The Situation Presented in the No-Called Doubtful Stutes. The official list of States, outside of the solid South, which the Democrats are to carry was made known at Chairman Harrity's headquarters yesterday. They are New York, New Jersey, Connecticut, Indiana, Illinois, and Wisconsin. The Dakotas and Montana have not yet been put upon the list, but it was declared that within a week or two Chairman Harrity

and his associates will perform this duty. Representative W. Bourke Cockran was one f the distinguished visitors at headquarters "I do not see a single break now in the horizon. Everything is working together for Democratic success. I am firm in the opinion that the State of New York is safer for Cleve-

land and Stevenson than any other of the seriously contested States. "I am going to speak in Indiana, and then work my way back to this State, making as many addresses as I can in the time at my disposal, or rather at the disposal of the National Committee, under whose orders I have been glad to place myself in the service

of the Democratic cause." Mr. Cockran was supported in his views by also knew a thing or two about New Jersey. "I have spent five weeks in New Jersey." he said, "and met a great number of people from all parts of the State. All speak confidently, and are full of enthusiasm for the cause and the tisket, and I have no doubt that New Jur-sey will do even better in maintaining her-record for the Democratic cause than she has done best ofers. record for the Democratic cause that record for the Democratic cause that record for the Democratic cause that does heretofore.

"I have just returned from Saratoga, where I spent several weeks. I met gentlemen from all parts of this State, many of them merciants, and all say that the sentiment among business men in their communities is more favorable to the Democratic ticket than they have ever known it before.

"They all express the greatest hope and confidence in the vote of this city, and that the efforts of Tammany Hall will fully meet the expectations of the most sanguine in the cause. I feel assured that Tammany Hall will leave nothing undone to roll up an immense majority for Cloveland and Stevenson."

Representative Gelssenhainer of Freehold was more explicit concerning New Jersey than Mr. Blumenthal. He said the outlook in the State is most excellent, and he added:

"I think a larger Democratic majority will be polled than has ever been polled before. Whatever factions there may be throughout the State, there will be no difference of opinion on the national ticket. There will be very great accessions from the other side for the national ticket.

Ex-Mayor Baldwin of Waterbury told how Connecticut must be numbered among the safe Democratic States. His views will be interesting to ex-Representative Miles, the Connecticut champion at Mr. Carter's bureau Mr. Baldwin said:

"I don't see how it is possible for the Republican party to make any stronger light this yearthan four or eight years ago in Connecticut. They then did all that money and sweakers and threats and promises could effect to influence the labor vote.

"They failed then and will fail now, for naturally Connecticut is a Democratic State. The failure of the voters to see any great good results from the McKinley bill will also influence the habor vote.

"They failed then and will fail now, for naturally Connecticut is a Democratic State. The failure of the voters to see any great good results from the McKinley bill will also influence the magnetity. Then, too, the Connecticut Republicans wanted Mr. Blaine.

"W

and Sam Fessenden at heart want Harrison elected."
Indiana is placed in the list on the ground that the Democratic machinery of the State is in better running order than in 1888. Hilmors is down on the declarations that the Lutherans have left the Republican party in droves, and that of the eighty-five German newspapers in the State seventy eight are advocating the Democratic national ticket.
This is double the number of German newspapers which supported the Democratic candidates four years ago. Wisconsin is down also because of the defection of German Republican voters.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders.

The purest baking powder makes the finest, sweetest, most delicious food.

The strongest baking powder makes the lightest food. That baking powder which is both purest and strongest makes the most digestible and wholesome food.

Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

The United States Government tests (Dep. Ag'l Bulletin 13, p. 599) show the Royal Baking Powder superior to all others.

SOUTH CAROLINA POLITICS. Will a Third Party Ticke: He Rus So as to Best Mr. Cleveland?

COLUMBIA, S. C., Sept. 2.-The Third party spectre has developed into a living issue in this State. The leaders were only waiting until after the Democratic primaries they publicly declared themselves. J. H. Bowden, managing editor of the Gutton Plant, the official organ of the State Alliance, said in an

interview this evening:
"I state positively that Third party electors will be placed in the field before the first of October. We have been going slow without organizing ourselves into a concrete body. but there are about 30,000 of us who won't vote for Cleveland. We will take no hand

vote for Cleveland. We will take no hand in the State and Congressional contests. Individually we favor Gov. Tillman and the Alliance Congressional nominees, and we are consistent in voting for them. We are going to work organizing, and you will see that the country people will flock to our support when the battle cry is raised.

Weaver is coming to South Carolina soon and will stump the State in our interest. The general plan of our campaign is undecided."

This will complicate political affairs in this State. Almost every third partyle here is a Tillmanite. The total vote for Tillman in Tuesday's primary was 53,000. Taking away the third partylies he would have about 20,000 Democratic followers.

On the other hand, there were 33,000 votes cast against Tillman, and of these 30,000 are cleveland Democrats. This will involve a triangular fight, which will give the Republicans a good chance, as they claim to have 00,000 negroes registered.

An afternoon newspaper to-day charges that Gov. Tillman is in collusion with the third partyles, and that he has set the machinery in metion in order to make good his prediction that South Carolina would not support Cleveland.

PHILADELPHIA, Sept. 2.-It was practically settled to-day that there will be no candidate named for Congress in the Third district by

the Republicans.

A majority of the leaders of the party are opposed to making any nomination, and it s the prevailing opinion on all sides that if ithis policy is followed out Congressman Mc-A leer will defeat his factional opponent ker by a handsome majority on election day.

It was agreed to-night by the organization known as the County Democracy to hold a convention in the Third district under the auspices of that body, and that it should be had under the division representation. under the division representation idea, h is the rule for conventions of the county

Prof. Moore of Philadelphia Giving Mim a Course of Massage Treatment. PHILADELPHIA, Sept. 2.-Prof. Robert Moore of this city, who has been giving a course of massage to ex-Secretary James G. Blainent his Bar Harbor home, returned home

on Thursday, and last evening spoke with enthusiasm of his famous patient. "I will always remember my massage treatment of Mr. Blaine," he said. "for up to now he has been my most distinguished patient. His politeness is remarkable. In my business we often have patients who are cheerful one we often have patients who are cheerful one day and gloomy and worried the next, but the charm about Mr. Blaine is that he is always the same. The course of massage treatment to which I subjected him extended over two weeks, and I had abundant opportunity to judge what sort of a man he is when he is well and when he is not.

Republican Discord in the Twenty-eighth Congress District.

ROCHESTER, Sept. 2.- The members from Ontario, Yates, and Cortland counties of the Republican Congressional Committee of the Twenty-eighth district met at Geneva to-day and discussed the appointment for the Congress Convention made by the Special Committee of the State Committee at Utica on mittee of the State Committee at Utica on Aug. 12. The members of the conference are very much disgusted with the appointment, because it gives Cayuga and Wayne counties, which are for Congressman Sereno E. Payne of Auburn, twenty delegates, and the other three counties only eighteen delegates. Ontario, lates, and Cortland are for John Ilaines of Canandaigua for member of Congress. No action was taken at to-day's conference, and an adjournment was taken until to-morrow, when another meeting of the kickers will be held at Pennyan.
